

Ideas:

- Lazy Susan Restaurant Chooser(Multiple teams have taken/tried)
- AI Powered Education
- Educational Bartending Game
- AI-Powered Data Privacy & Anonymization Tool
- **Personal management app for finance and time**
  - **Budget Tracker?**
  - **Personal Growth and Time management**<- probably, to do list theme
    - **Keep people engaged, game?**
    - **Some sort of Gamification**
    - **Plant/Pet management mini game**
    - **Family, mom sends kid a task, get reward**
      - **Maybe parent controlled, push tasks to kids and reward for completion**
    - **Themes that are unlocked, get enough points = new looks**
    - **Social tab? Fosters community within the app(nope)**
      - **Minigames or something to do with friends**
    - **Database to store user data, things like save states and implementing the minigames**
    - **teamwork : groups working together at jobs, schools, etc can share a to-do list to keep each other up to date on tasks to be completed.**

Preferences:

- Mobile App

- React Native, Cross-Platform Capable.
- Lifestyle/Everyday Usability
- Meetings: Saturdays 10-11am on discord
- Microsoft to do
  - Pros:
    - Sort tasks by importance, due date, alphabetically, creation date
    - Move tasks up and down on your list (importance)
    - Set themes to your lists (solid color, pictures)
    - Group tasks
    - Can plan out your day
    - Add steps to a tasks (i.e. clean room -> make bed-> laundry)
    - Others can assign you a task
    - Toggles to link you to other microsoft apps (teams, a doc, workbook, outlook, etc)
    - Section for flagged emails to add to To-Do
  - Cons:
    - Can't color code your tasks
      - You can do color categories, but doesn't necessarily help organize
    - Only dark/light mode
    - No calendar view (takes you to outlook mail -> inconvenient?)
    - No AI-driven enhancements
- Todoist
  - Pros:

- Collab with a team
- Can choose personal, work, education
- Accessible ‘help’ tools to help user navigate/ utilize a feature
- “Inbox” section that you can braindump random things you need to do
- You can earn points to unlock themes
- Reminders (email, computer notif, mobile)\
- Templates for meal prepping, project tracker

○ Cons:

- Limited free-tier capabilities (pay for pro)
  - Pro has ai assistant, themes, auto backups
  - Location reminders
  - Specific times
- To add a team, you have to pay
  - Each team comes with 5 free projects

● Notion

○ Pros:

- private/ public settings
- Free templates
- AI
- Invite members
- Customization

○ Cons:

- Complex interface

- You have to know how to build pages + how to customize them  
(complicated, overwhelming)

Lazy Susan Restaurant Chooser: A mobile app that helps users randomly choose a restaurant based on user preferences like dietary restrictions and distance.

Educational Bartending Game: A game app that provides a cost-effective and engaging way to learn mixology skills to prepare for the bartender exam,
